## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the combined one stream" in line 35. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the .... rejected streams" in lines 33. There is insufficient antecedent basis for this limitation in the claim. It is unclear if the rejection stream is the same as the non-permeate stream.

Claim 1 recites the limitation "the last polymerization reactor" in lines 38-39. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "the gas flow" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "the adjacent integrated reactor module" in line 12. There is insufficient antecedent basis for this limitation in the claim.

Claim 13 recites the limitation "the gas flow" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1764

Claim 13 recites the limitation "**the** adjacent integrated reactor side of **the** integrated reaction-separation module" in lines 6-7. There is insufficient antecedent basis for this limitation in the claim.

#### *Allowable Subject Matter*

Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The primary reason for allowance is that no prior art of record discloses or renders obvious a process for either dehydrogenation or polymerization by using a membrane reactor as called for in claims 1, 11 and 13.

#### *Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tam M. Nguyen whose telephone number is (703) 305-7715. The examiner can normally be reached on Monday through Thursday.
